Protagonist
Software Engineering Intern

Dear Protagonist,

As a rising senior who has been steadily growing who has been steadily building experience, I am very interested in your position for a Python Software Engineering Intern. My current experience aligns with this role extremely well and I hope to use your company to really hone my skills in Python and data analysis software!

From my prior internships and personal endeavors, I have formed relevant experience that I think suit the needs of your company:

- Scrum/Agile Software Development
- Python
- Pandas
- Bokeh
- Git
- Docker
- Teamwork and Problem-solving skills

Beyond these skills, I have much more knowledge that I believe would be impactful at Protagonist. I hope you give me the opportunity to use your company to further my career path.

Thank you,

Emmanuel Jones
